Myrosta — Frequently Asked Questions

Getting started

Do I need to download an app from the App Store?

No. Myrosta is a web app — open **https://myrosta.com.au** in your browser. You *can* add it to your home screen so it behaves like an app (Share → *Add to Home Screen* on iPhone; ⋮ → *Install app* on Android), but there's nothing to install from a store.

Is there a password?

No passwords. You sign in with a **6-digit code** sent by **SMS or email**, then you **stay signed in** on that device — so it's effectively a one-time login.

I didn't get my sign-in code.

- Check your **junk/spam** folder.
- Codes last about an hour — if it's been a while, tap **Resend code**.
- Try 📱 **Mobile (SMS)** — switch to Mobile on the sign-in screen and enter your number (handy if your hospital email blocks external mail).
- Make sure you used the **mobile or email** your admin has on file.
- Still nothing? Your details may not be on the access list yet — contact your roster admin.

My hospital blocks external email — can I use a personal email?

Yes — two options: sign in by 📱 **Mobile (SMS)** (a texted code, nothing to do with email), or ask your roster admin to add a **personal email** to your record (the **Alt email** field) and use that. Either way the code only carries a 6-digit number, no roster data.

Can I use it on more than one device?

Yes — sign in on your phone, tablet and computer. Each stays signed in independently.

Is this a shared or ward computer?

Tick ‘This is a shared computer’ at sign-in — that session won't stay logged in and signs out when you close it or after a short idle. On your own phone, leave it unticked and you stay signed in.

It logged me out / I'm on a new phone.

Just sign in again with a fresh code. Your data is in the cloud, so nothing is lost.

Using it as staff

Where do I see my shifts?

The **My shifts** tab — as a list or a month calendar. Tap **Add to calendar** to push them (with reminders) into your phone calendar.

How do I pick my shifts?

When the admin opens a round, go to **Self-roster**. Depending on the method, you'll either take turns (waves/snake draft) or book openly — you'll only ever see slots that are still free.

What if two of us click the same shift at the same time?

Impossible to double-book. The moment someone takes a slot it disappears for everyone else. If you both tap at the same instant, the app sorts it out and only one booking sticks — the other person simply sees the next available option.

I'm last to log in — do I miss out?

No. Fairness rules and per-fortnight **quotas** keep it even, so the order people log in doesn't decide who gets a fair share.

I booked the wrong shift.

While the round is still open, tap your booked slot to **release** it, then pick the right one. If it's closed, message your admin.

What does a pink shift mean?

Pink with an ‘L’ marks a locum shift — one you're covering on top of the normal roster. It also shows in your shift tally and on exports.

How do I request leave or a swap?

Requests → **Request leave** (pick dates + type) or **Request a swap** (your shift ↔ a colleague's). It goes to the admin; you're notified when it's decided, and the roster updates automatically.

My leave request was declined — why?

The admin sees how many people are already away and the daily cap. If a day's already at capacity, they may ask you to pick different dates. Use the **Leave planner** to spot quieter days first.

I have a fixed pattern that's wrong.

If your pattern is locked, use the **request a change** option — it goes to the admin for approval rather than changing silently.

I'm rostered but I'm off sick — what do I do?

In **Requests** → **Request leave**, choose **UPL (Unplanned leave)** for the date(s). Once your admin actions it your shift comes off the roster, and the gap is visible for a colleague to pick up as locum cover.

Will I be reminded about shifts?

Yes — an in-app alert when self-roster opens, and (if your admin has reminders switched on) an email/text when a round opens and the day before a shift. Adding your shifts to your phone calendar gives you reminders too.

Where do I get help inside the app?

The **Help** tab — quick guides and FAQs for staff (with an extra section for admins).

Can I send feedback or report a bug?

Yes — Help tab → 💬 Send feedback. It goes straight to your roster admin: a bug, an idea, or something confusing.

Data, privacy & reliability

Where is our data stored?

In a secure cloud database hosted in **Sydney, Australia** (aligned with the Privacy Act 1988 & the APPs). Only people on your **access list** can read or change anything — even with a valid login, an unknown email gets a "No access" screen.

Is it secure?

Yes — sign-in is required, access is limited to an approved list, all traffic is encrypted (HTTPS), and there's a full **audit log** of every approval and change.

What happens if I lose signal mid-booking?

Your booking only counts once it's saved to the cloud, so you'll never half-book. Reconnect and try again — you'll see the current, live state.

Does everyone see the same thing live?

Yes. Changes sync in real time — a shift booked or leave approved on one device updates for everyone within moments.

Who do I contact for help?

Message your roster admin from inside the app (**Messages**), or ask them directly. Admins manage staff, access and the roster.
