Myrosta — Staff Guide

Your shifts, self-rostering, leave and swaps — on any device.

Myrosta is our Emergency Department roster app. It shows you your own shifts, lets you pick them fairly when rostering opens, and handles leave and swaps — all from your phone or computer. This is your quick guide.

Signing in (just once)

1. Open **https://myrosta.com.au** and tap **Sign in**.
2. Choose 📱 **Mobile (SMS)** (the default) and enter your mobile — or tap ✉️ **Email** — then **Send code**.
3. Type the **6-digit code** you receive (by text or email) → **Verify**.
4. You're in — and you **stay signed in** on that device, so you won't have to do this again.

On a shared or ward computer? Tick ‘This is a shared computer’ at sign-in — it signs you out when you close it or after a short idle. On your own phone, leave it unticked.

Add it to your home screen so it opens like an app:

- **iPhone (Safari):** Share button → *Add to Home Screen*.
- **Android (Chrome):** ⋮ menu → *Add to Home screen*.

No code? *Check your junk/spam folder, wait a moment then tap* ***Resend code****, and make sure you used the mobile or email your admin has on file.* ***Hospital blocking external mail?*** *Just use* 📱 ***Mobile (SMS)****, or ask your admin to add a* ***personal email****. Still stuck → message your roster admin.*

Your shifts — "My shifts"

- See **only your own** shifts, as a **list** or a **month** calendar (weekends are shaded).
- Tap **Add to calendar** to push your shifts — with reminders — straight into your phone's calendar.
- **Locum shifts** (ones you cover on top of your roster) show in pink with an ‘L’, and in your shift tally.

Booking your shifts — "Self-roster"

When the admin opens a rostering round, go to **Self-roster** and pick your shifts.

- You only ever see slots that are **still free** — the moment someone takes one it disappears, so **two people can never book the same shift**.
- Your progress shows against your **quota** (how many shifts you owe, usually counted per fortnight to match pay).
- Tap a slot to **book** it; tap your own booked slot to **release** it (while the round is still open).

How the round runs is set by your admin — you might see:

- **Cohort waves** — small groups take turns; pick yours when it's your wave's turn, then mark **Done**.
- **Snake-draft** — everyone takes turns one at a time, and the order reverses each round.
- **Guarded booking** — open booking, with fairness rules so nobody races ahead of their share.
- **Auto-draft + adjust** — the app drafts a fair roster and you tweak or swap where needed.

However it's run, fairness rules and quotas mean **the last person to log in still gets a fair go**.

Requesting leave

1. **Requests** → **Request leave**.
2. Pick your **dates** and the **type** (Annual, CME, Long service, Parental, Public holiday…), add a note if you like → submit.
3. The admin reviews it with full context and decides. You're **notified**, and it updates the roster and leave planner automatically.

Off sick? (unplanned leave) *Choose* ***UPL — Unplanned leave*** *for the date(s). Once your admin actions it, your shift comes off the roster and the gap is visible for a colleague to pick up as* ***locum*** *cover.*

Tip: *check the* ***Leave planner*** *first to pick days when fewer colleagues are away — those are likelier to be approved.*

Swapping a shift

1. **Requests** → **Request a swap**.
2. Choose **your shift**, the **colleague**, and **their shift** you'd like to swap into → submit.
3. Once the admin approves, both rosters update.

The Leave planner

A colour-coded view of the **whole team's leave for the year** — so you can see who's away and plan around it.

If you work a fixed pattern

Some consultants have a set pattern (e.g. every Tuesday AM, or a fortnightly A/B week). You'll see yours in the app. If it's **locked** and needs changing, use **Submit change for approval** — it goes to the admin rather than changing on its own.

Staying in the loop

- The **bell** shows your alerts — approvals, roster changes, and when self-roster opens.
- You may also get an **email or text** when a round opens or the day before a shift (if your admin has reminders switched on).
- The **Help** tab has quick guides and answers any time you're unsure.
- **Send feedback** — Help tab → 💬 Send feedback goes straight to your roster admin.
- **Messages** lets you message the admin or the team.

A few tips

- **Sign in on your phone and add it to your home screen** — then you're always one tap away, already logged in.
- **Add your shifts to your calendar** so you get reminders.
- **Book promptly** when self-roster opens — but don't worry about being last; it's designed to be fair.
- **Questions?** Message your roster admin from inside the app.
